RESPONSE TO FIRE IN THE FIRST 5 MINUTES SAVES LIVES

The greatest temperature increase in case of fire happens in the first five minutes and it plays a crucial role. If fire can be detected and first response is given in the shortest time possible, it can be prevented.

And the first response is only possible by a dedicated fire team on site.

Equipping the businesses with a first response fire services team called Emergency Response Team (AMT), Securitas Fire Services can prevent possible losses that will occur until the provincial fire brigades reach the scene before they reach such an extent that can't be compensated.

TEMPERATURE INCREASE

5 MINUTES
555 DEGREES

10 MINUTES
660 DEGREES

30 MINUTES
820 DEGREES

60 MINUTES
927 DEGREES

Temperature increases so fast in the fire scene.

Fire Growth Rate

A tiny fire incident that could be extinguished with a small glass of water at initial stage can only be extinguished with a bucket at the second minute and finally with a barrel full of water at the third minute.

Embrace Securitas' professional "Emergency Response Team (AMT)" that can match the speed of fire thanks to on-site and instant response to fire!

TURKEY'S FIRST PRIVATE FIRE BRIGADE INITIATIVE

Bringing segment-specific solutions, Securitas now sets up the first private fire brigade service of Turkey. Overseeing the values of your business thanks to fire prevention and first response services in addition to private security services and integrated security solutions, Securitas reduces your costs, guards your investments and minimizes the risks.

Securitas Fire Services cover;

- Expert AMT that has received Basic Fire Trainings
- Watchman
- Fire Risk Analysis and Consultancy
- Segment and Business Specific Scenarios
- Technical Infrastructure, Fire Response Vehicles and Equipment
- Search and rescue vehicle specially designed for your needs.
- Multi-Role Security Guard

SECURITAS "MULTI-ROLE" SECURITY STAFF (MRSO)

Information leader Securitas brings an efficient solution to the need of first response to fire that might occur in risky working and production areas with its Fire Services and delivers such service through "Multi-Role" security guard that have received fire trainings.

"Multi-Role" security guard (MRSO) are selected in such qualification to keep up with the physical conditions of projects instantly. MRSO turn into "Multi-Role" fire officers with all required skills and equipment after completing their trainings on patrol, first response, fire, rescue, prevention, detection and extinguishing.

SECURITAS WATCHMAN

After receiving basic fire trainings and ensuring necessary Occupational Health and Safety (OHS) rules and business requirements set up by the organization, Securitas Watchman checks the implementation and accuracy of rules. Receiving trainings by customers, "Securitas Watchman" ensures that everything is sustainable. The audits to be performed within the scope of "Watchman" practice, which is developed for visitors, suppliers or employees, presents the capability of real time reporting.

Your MRSO turn into fully equipped MRSO with necessary skills to protect you and your valuables from fire.

Securitas Fire Services Prevents growth of fire And prevents you and your valuables against fire with their trained staff and strong equipment.

FIRE RISK ANALYSES AND CONSULTANCY

Our business partners work with Securitas' expert fire risk analysis team closely. Studying the targets, critical points and evacuation plans in detail, our team fulfills the preventive systems in accordance with current regulations and international standards. You can also benefit from the first response solutions of Securitas and protect the values of your business thanks to fire risk analysis in which periodical tests and maintenance actions are also planned.

Purpose oriented vehicle supply

Securitas Fire Services provide fire brigade vehicle, first response vehicle and specially designed search and rescue vehicle in accordance with your requirements.

SEGMENT SPECIFIC SOLUTIONS

Initially, selection and placement process have to be conducted in greatest attention for the fire services that are delivered also as a legal procedure in industrial facilities, high volume business load and organized industrial zones. The fire services staff that are trained in order to analyze the needs of different industries carefully are continuously equipped with segment-specific and facility-oriented trainings. In this way, fire services team are able to think more analytically with more information and turn into experts that can foresee risks and produce solutions to prevent any incident before it occurs.

Securitas Fire Services main activity segments:

- Air and Sea Ports
- Industrial Facilities
- Plazas and Residences
- Petrochemical Industries
- Organized Industrial Zones

***Trained to better analyze
the needs of different industries,
fire services staff are
continuously equipped with
segment-specific and
facility-oriented trainings
of Securitas.***

In addition to fully certified trainings, expertise of the team is always kept fresh with drills throughout the year.

UP-TO-DATE EXPERTISE WITH CONTINUOUS TRAINING

Securitas sets up its multi-role teams with multi-skill acquiring trainings to AMT / fire teams and security guard. Maximum benefit is acquired thanks to this source allocation and training system.

In addition to basic fire trainings mandated by laws for first response teams, there are also on-site facility-specific trainings according to

the fire risk status of industrial facilities. While such trainings can be refreshed once a year, two years or three years based on the fire risk value, they can also be organized semi-annually like orientation trainings. In addition to fully certified trainings, expertise of the team is always kept fresh with drills throughout the year.
